# Safety

## IMPORTANT SAFETY INSTRUCTIONS

1. To disconnect the machine from the electrical power supply, turn off the power switch and remove the power cord plug from the wall socket. The wall socket must be easily accessible and in close proximity to the machine.
2. Read these instructions carefully. Save these instructions for future reference.
3. Follow all warnings and instructions marked on the product.
4. Do not use this product near water.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register or in a built-in installation unless proper ventilation is provided.
7. This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

This device complies with the requirements of the EEC directive 2004/108/EC with regard to “Electromagnetic compatibility” and 2006/95/EC “Low Voltage Directive”.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

## CAUTION ON LITHIUM BATTERIES

There is a danger of explosion if the battery is replaced incorrectly. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

## LEGISLATION AND WEEE SYMBOL

2012/19/EU Waste Electrical and Electronic Equipment Directive on the treatment, collection, recycling and disposal of electric and electronic devices and their components.

The crossed dust bin symbol on the device means that it should not be disposed of with other household wastes at the end of its working life. Instead, the device should be taken to the waste collection centers for activation of the treatment, collection, recycling and disposal procedure.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract.

This product should not be mixed with other commercial wastes for disposal.

# Revision History

Changes to the original user manual are listed below:

Revision	Description	Date
1.0	• Initial release	December 2009
1.1	• 12.1" LCD brightness updated	November 2011
1.2	• C46 MB added	April 2012

g	Power button
h	PS/2
i	Line-out
j	Power LED indicator

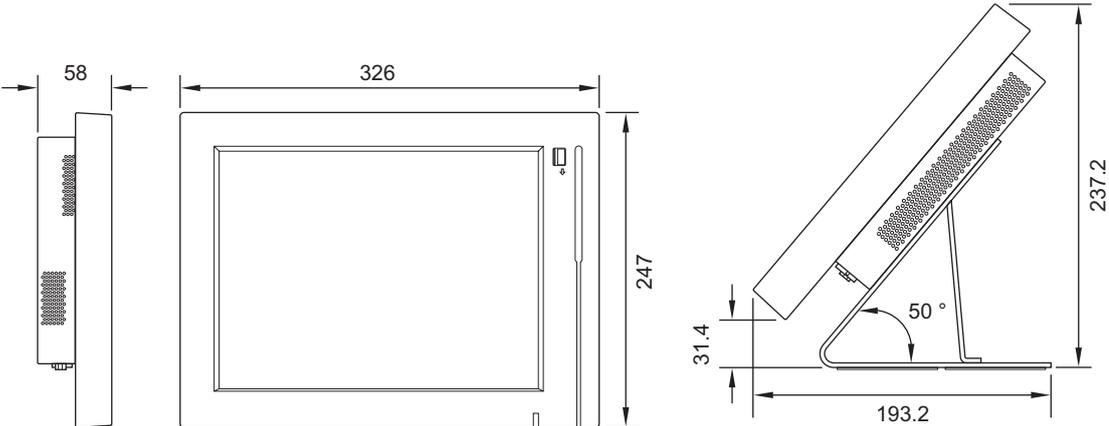

**Note:** The location of the I/O ports may vary slightly, depending on whether you have a system with or without fan.

# 2-5. Dimensions

## 2-5-1. 8.4" System

## 2-5-2. 12.1 System

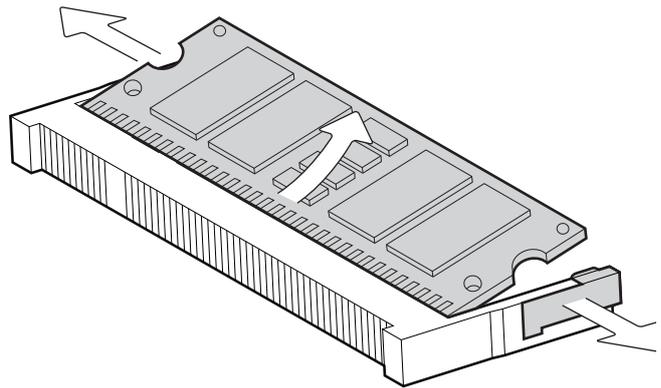

# 3. System Assembly

## 3-1. RAM Module Replacement

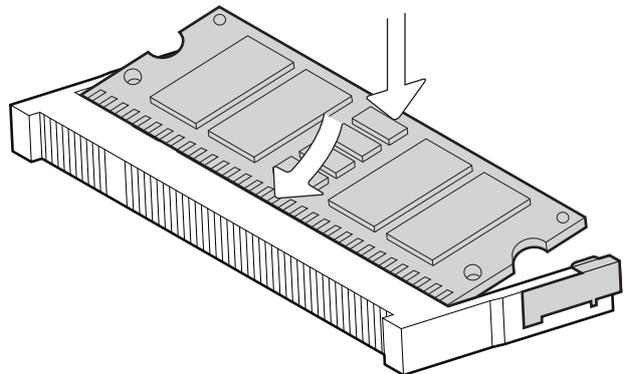

### Removing a RAM module

1. Please Open the rear cover by unfastening the screws (x8) to access the motherboard. (See Chapter 3-2)
2. Use both fingers to pull the ejector clips out of the sides of the module.
3. Slide out to remove the memory module from the memory slot.

### Installing a RAM module

4. Slide the memory module into the memory slot and press down until the ejector clips click in place.

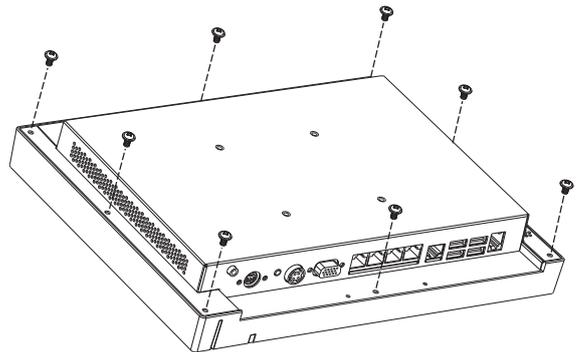

## 3-2. HDD Replacement

To remove and replace the HDD, please follow the steps below. The procedure is different depending on the 8.4" and 12.1" system being installed.

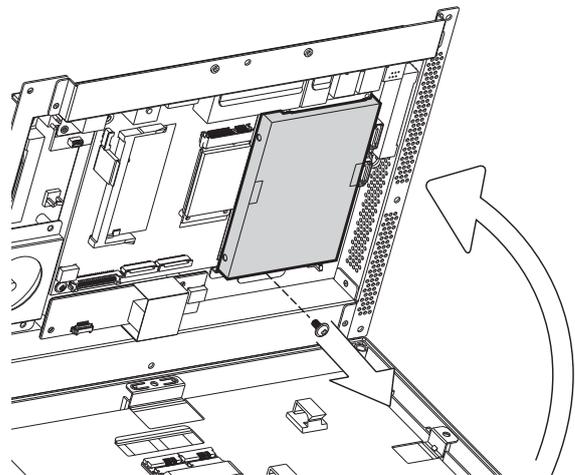

### 3-2-1. HDD replacement for 8.4" system

The HDD is installed on the motherboard, you need to uncover the rear cover first to access it. If your system is equipped with a stand or a wall-mount bracket, please remove them first.

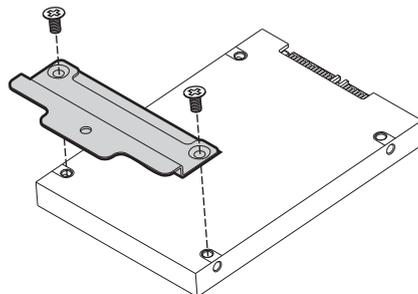

1. Turn to the rear side of the system and open the rear cover by unfastening all the screws (x6).

2. **Gently** flip up the rear cover due to various connectors connecting the motherboard to the LCD screen.
3. Unscrew the screw (x1) of the HDD holding bracket.
4. Disconnect the HDD connector and remove it with the holding bracket from the motherboard.

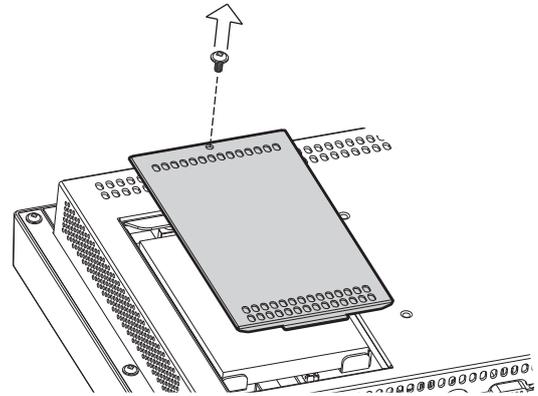

5. Unfasten the screws (x2) to separate the HDD holding bracket from the hard drive disk.
6. Reverse the steps above to replace the hard drive disk.

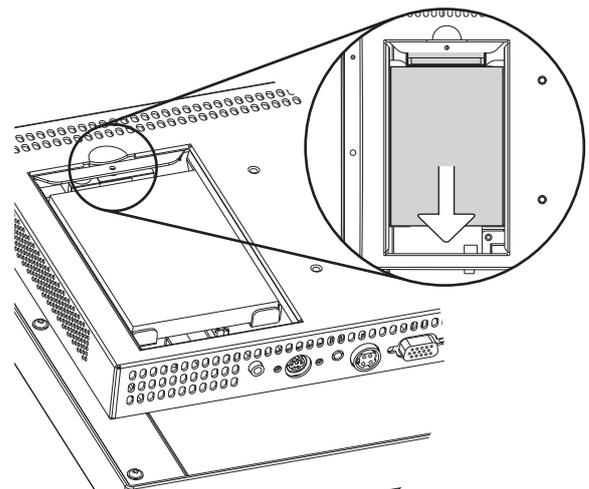

### 3-2-2. HDD replacement for 12.1" system

You can access the HDD easily by turning the system to the rear side on a 12" system. Please see detailed procedure below.

1. Turn to the rear side of the system to access the HDD door.
2. Unscrew the screw (x1) securing the HDD door to the rear cover of the system.

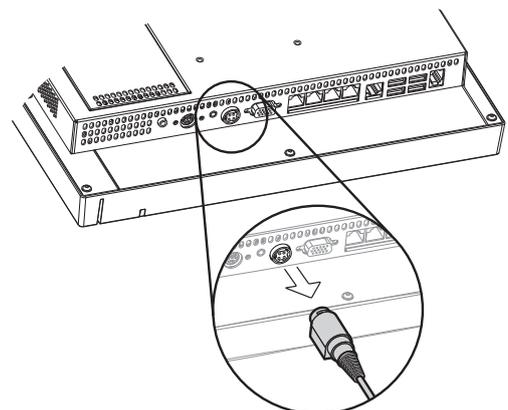

3. Disconnect the SATA cable from the drive.
4. Reverse above steps to replace the hard drive disk.

### 3-3. Power Adapter Installation

The system is equipped with a 65W power adapter, please plug it in as shown below.

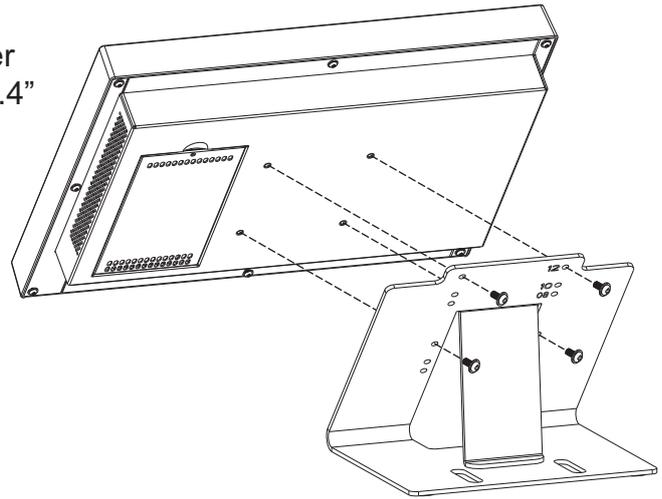

1. Please connect the power adapter to the DC-IN Connector on the I/O panel.

# 4. Peripheral Installation

## 4-1. Stand Installation

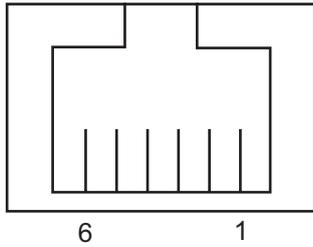

1. Fasten the screws (x4). The screw location may slightly differ according to the system size (8.4" and 12.1") being installed.

## 4-2. Cash Drawer Installation

You can install a cash drawer through the cash drawer port. Please verify the pin assignment of your cable before installation.

### Cash Drawer Pin Assignment

Pin	Signal
1	GND
2	DOUT bit0
3	DIN bit0
4	12V / 19V
5	DOUT bit1
6	GND

### Cash Drawer Controller Register

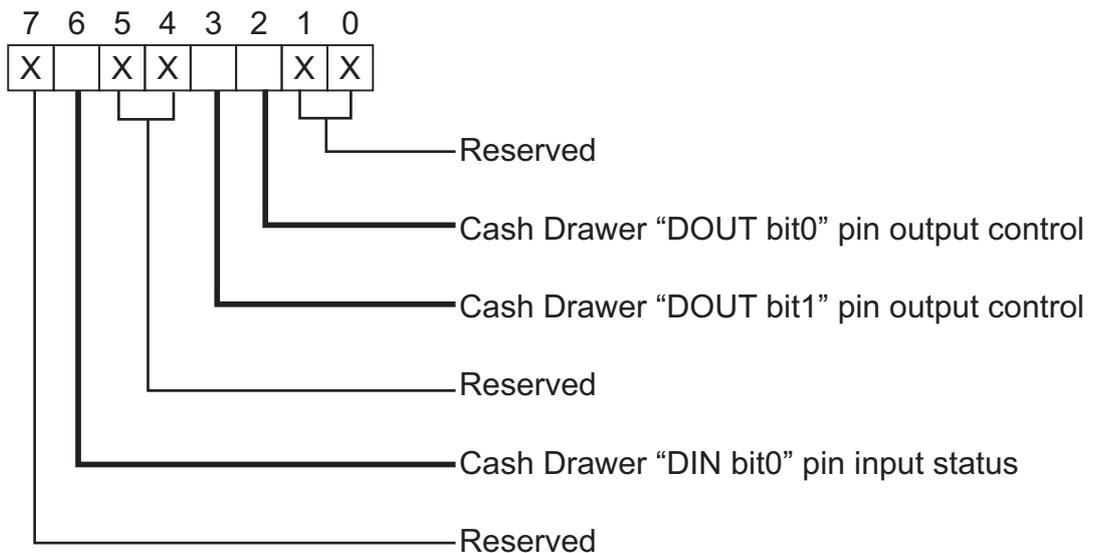

The Cash Drawer Controller use one I/O address to control the Cash Drawer.

**Register Location:** 48Ch

**Attribute:** Read / Write

**Size:** 8bit

BIT	BIT7	BIT6	BIT5	BIT4	BIT3	BIT2	BIT1	BIT0
Attribute	Reserved		Read	Reserved	Write		Reserved	

- Bit 7: Reserved
- Bit 6: Cash Drawer "DIN bit0" pin input status.
  - = 1: the Cash Drawer closed or no Cash Drawer
  - = 0: the Cash Drawer opened
- Bit 5: Reserved
- Bit 4: Reserved
- Bit 3: Cash Drawer "DOUT bit1" pin output control.
  - = 1: Opening the Cash Drawer
  - = 0: Allow close the Cash Drawer
- Bit 2: Cash Drawer "DOUT bit0" pin output control.
  - = 1: Opening the Cash Drawer
  - = 0: Allow close the Cash Drawer
- Bit 1: Reserved
- Bit 0: Reserved

Note: Please follow the Cash Drawer control signal design to control the Cash Drawer.

### Cash Drawer Control Command Example

Use Debug.EXE program under DOS or Windows98

Command	Cash Drawer
O 48C 04	Opening
O 48C 00	Allow to close
<ul style="list-style-type: none"> <li>▶ Set the I/O address 48Ch bit2 =1 for opening Cash Drawer by "DOUT bit0" pin control.</li> <li>▶ Set the I/O address 48Ch bit2 = 0 for allow close Cash Drawer.</li> </ul>	

Command	Cash Drawer
I 48C	Check status
<ul style="list-style-type: none"> <li>▶ The I/O address 48Ch bit6 =1 mean the Cash Drawer is opened or not exist.</li> <li>▶ The I/O address 48Ch bit6 =0 mean the Cash Drawer is closed.</li> </ul>

## CMOS Operation Mode

### CMOS Reset

To clear the CMOS,

1. Remove the power cable from the system.
2. Open the system, and set the 'CMOS Operation jumper' from 'CMOS Normal' to 'CMOS Reset'. (refer to the jumper shown below)
3. Connect the power cable to the system, and **power on the system:**  
in ATX mode: press the power button and it will fail power on  
in AT mode: turn on system power
4. Remove the power cable from the system.
5. Return the "CMOS Operation mode" jumper setting from "CMOS Reset" to "CMOS normal".
6. Connect the power cable and power on the system.

## COM3 & COM4 Power Setting

COM3 and COM4 can be set to provide power to your serial device. The voltage can be set to +5V or 12V by setting jumper JP18 on the motherboard. When enabled, the power is available on pin 10 of the RJ45 serial connector. If you use the serial RJ45 to DB9 adapter cable, the power is on pin 9 of the DB9 connector. By default, the power option is disabled in the BIOS.

### BIOS/Utility setup

1. Power on the system, and press the <DEL> key when the system is booting up to enter the BIOS Setup utility.
2. Select the Advanced tab.
3. Select Power Configuration COM/VGA Ports and press <Enter> to go to display the available options.
4. To enable the power, select COM3 Power Setting or COM4 Power Setting and press <Enter>. Select Power and press <Enter>. Save the change by pressing F10.

### COM Power Setting

Function	JP9

Please see the following page for jumper JP9 location

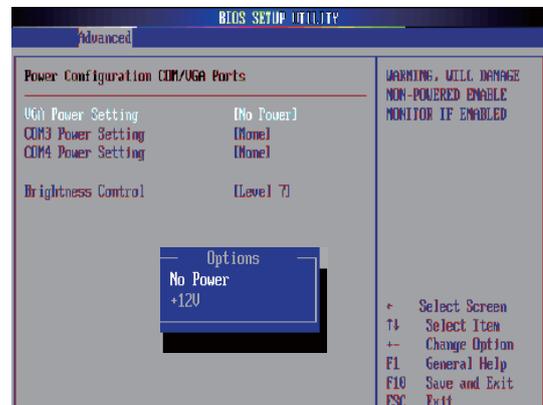

## 2nd VGA Power Setting

VGA port power must be on through BIOS/Utility for default is "No Power".

1. Power on the system, and press the <DEL> key when the system is booting up to enter the BIOS Setup utility.
2. Select the Advanced tab.
3. Select Power Configuration COM/VGA Ports and press <Enter> to go to display the available options.

4. To switch on the power, select "+12V". Please save the change before exiting BIOS to avoid data lost.

# Appendix: Drivers Installation

The shipping package includes a Driver CD in which you can find every individual driver and utility that enables you to install the drivers on the system.

Please insert the Driver CD into the drive and double click on the “index.htm” to select the models. You can refer to the drivers installation guide for each driver in the “Driver/Manual List”.
